

# PATIENT RESPONSIBILITIES

The care a patient receives depends partially on the patient himself. Therefore, in addition to these rights, a patient has certain responsibilities as well. These responsibilities are presented to the patient in the spirit of mutual trust and respect.

- ◆ Provide accurate and complete information regarding your health status.
- ◆ Follow recommended treatment plans.
- ◆ Abide by hospital rules and regulations affecting patient care and conduct and be considerate of the rights of other patients and hospital personnel.
- ◆ Fulfill your financial obligations as soon as possible after discharge.
- ◆ Make it known if you do not understand what you have been given in education, instructions or communication.
- ◆ Protect your valuables by sending them home with family members or have them placed in the hospital safe.
- ◆ Participate in your plan of care and cooperate with your physicians and caregivers.
- ◆ Tell the hospital if you have prepared an advance directive for health care and provide a copy (Medical Power of Attorney or Living Will).
